## REAR GARDEN & SOLAR PANELS

## EXTRA INFORMATION

- Hardwired with Cat 6 data cables throughout - Fibre Broadband is installed to the property.
- A Mechanical Ventilation with Heat Recovery (MVHR) system is in place which extracts condensation rich stale air from the kitchen & bathrooms and removes the moisture before pumping filtered/fresh air back into the living areas - this improves the energy efficiency, humidity and indoor air quality.
- Solar Panels are installed to both the roof and at ground level in the garden.
- The energy costs provided by the vendor are currently approx £300 per annum for gas and approximately £60 credit per annum for electricity sold back to the grid even after spending approx £120 on EV charging. Obviously the electricity charges are variable and weather dependant as solar energy is key.
