Well Cottage Evendine Lane

WR13 6DT

Well Cottage, originally a thatch Cottage, was officially listed as a Grade II building by Historic England on September 19, 1984, confirming its historic and architectural significance. While the specific history of the cottage itself is not detailed, its location on Evendine Lane is notable for its connection to the Evendine Spring, a historic water source that supplied nearby properties, and the Malvern water industry which flourished in the Victorian era. The area also has historical ties to quarrying and worker housing. The area around Evendine Lane was also associated with local industries, including the Pyx Granite Company. This company built houses for its workers, which were located near a public water spout on 'The Tump'.
