How does Shared Ownership work?

Shared Ownership is a government scheme that offers you the chance to buy a share of a property from a housing association, a non-profit-making body that provides homes. Because you only own a part of the property, you can buy it with a smaller deposit and mortgage.

A smaller mortgage means smaller repayments but you'll also need to pay:

- rent on the share of the property you do not yet own
- monthly service charges

Shared Ownership homes can be new builds, existing properties, houses or flats. All Shared Ownership properties are leasehold, even houses.

Buy Back Lease

In some rural areas properties must be always available for shared ownership. This means if you buy over 80% of the share of the property, the freeholder (or other Housing association) must buy your property back (at market value) if you wish to sell on.
