DESCRIPTION

Constructed in 2020, the property has been built to a high specification with additions such as an air source heat pump, high level insulation, underfloor heating on the ground floor and a smart energy system with 40kw battery storage significantly reducing annual electric bills.

The stylish and light filled accommodation can only be appreciated upon internal inspection with the kitchen/dining room undoubtedly forming the heart of the home with doors leading directly on to the patio and garden. The large dual aspect sitting room also opens to the gardens with a wood burning stove creating a focal point. Additional areas on the ground floor include an entrance hall and separate cloakroom.

On the first floor there are three double bedrooms (2 with en-suite and one with a dressing room) together with a smaller room and family shower room.

A detached double garage has been divided to offer storage and a self-contained annexe ideal for extended family or an additional income. Furthermore, there is scope for the creation of additional accommodation by utilising the storage area. Parking for several vehicles is located to the front of the garage.

Level gardens wrap around the house with vegetable beds, entertaining areas, storage/workshop and a rainwater harvesting system.
