Additional Information

Storm Babet hit Chesterfield in October 2023- rain water of approximately 1-2 inches entered our property through the front door. New storm doors have been fitted back and front. It was not stipulated by our insurers but was our choice to install them as a matter of precaution rather than expectation. The drainage pipes at the back of the property which overlook the stream have been fitted with non-return valves via our insurers again as a matter of precaution rather than expectation. We have a dry certificate and there has not been a problem with renewing our house insurance. It must be stressed the stream at the side of our property was NOT the cause and has never given any problem.
