### Additional Information

Forget Me Not Barn dates back to the 1860s and originally formed part of Lower Farm, which was once a working dairy farm. Many of the original features have been carefully retained, with reclaimed brickwork and sandblasted walls seamlessly blended with modern additions. The property benefits from 200mm of insulation throughout, combining character with excellent energy efficiency. The current owner has sympathetically extended the original structure, creating a unique home that balances period charm with contemporary comfort. Opposite the barn, a small development of further barn conversions and landscaped garden areas is underway, enhancing the sense of community within this rural setting. The property is also sold with the reassurance of a 10-year Build Assure structural warranty, and any specific queries about the build can be addressed directly by the present occupier. The total square footage includes the square footage of the carport.

## Services

The property benefits from a modern Klargestert treatment plant, providing an efficient and environmentally friendly private drainage system. The unit is approximately 12ft deep, with all waste processed through macerator discs which continually turn to break down and treat the waste. The treated water is then safely dispersed into the reed beds, ensuring that nothing discharges directly into the ground. The system is cost-effective, with the current owners paying a maintenance fee of just £25 per month. It is serviced annually, remains under guarantee, and offers buyers peace of mind with a clean, reliable, and eco-conscious waste management solution.

The boiler is run from LPG gas and the electricity is mains.
